Data Flow Diagrams and User Stories

ServiceNow Employee Data Import Project

Date	October 2026
Project Title	Import Data using Transform Maps (Spreadsheet)
Platform	ServiceNow (Import Sets, Transform Maps, Dashboards)
Team Members	Moorthy R (Team Lead), Priyan N (Member), KATHIRAVAN M (Member)

User Stories & Acceptance Criteria

- US-1: As an HR Specialist, I want to load an Excel spreadsheet into ServiceNow so employee data is automatically staged.
- US-2: As a ServiceNow Admin, I want to map Excel columns to the Employee Test table so fields populate accurately.
- US-3: As an Admin, I want Coalesce enabled on Employee ID so re-imported rows update existing records instead of duplicating.
- US-4: As an Executive, I want interactive Dashboards showing Department and Location charts for real-time decision making.

Data Flow Diagram (DFD) Architecture

- Level 0 DFD: Excel File (.xlsx) ---> ServiceNow Import Set Staging ---> Transform Engine ---> Target Table (u_employee_test) ---> Reports & Dashboard.
- Level 1 DFD: 1.0 File Upload (Load Data) -> 2.0 Staging Table (u_employee_import) -> 3.0 Transform Map Engine & Coalesce Lookup -> 4.0 Database Write/Update -> 5.0 Report & Dashboard Aggregation.
