Proposed Solution Template

ServiceNow Import Data Project

Date	October 2026
Project Title	Import Data using Transform Maps (Spreadsheet)
Platform	ServiceNow (Import Sets, Transform Maps, Dashboards)
Team Members	Moorthy R (Team Lead), Priyan N (Member), KATHIRAVAN M (Member)

Proposed Technical Solution

The proposed solution leverages ServiceNow's native Import Set engine to stage raw data in 'u_employee_import'. A Transform Map named 'Sample Spreadsheet Import' maps source fields to 'u_employee_test'. Coalesce logic guarantees that existing records are updated while new records are inserted.

Step-by-Step Architecture Pipeline

- Phase 1: File Preparation (Sample Spreadsheet.xlsx)
- Phase 2: Custom Target Table Creation (Employee Test / u_employee_test)
- Phase 3: Data Loading & Import Set Creation (Employee Import / u_employee_import)
- Phase 4: Transform Map Configuration & Field Mapping
- Phase 5: Coalesce Configuration (u_employee_id = true)
- Phase 6: Delta Testing (Insert & Update verification)
- Phase 7: Reports & Dashboard Construction
